FOOD TECH

planners · engineers · builders

"Food Tech did an outstanding job from concept through to occupancy. Their professionalism in construction management resulted in a project that was on time, on budget and met all expectations. Many of the subcontractors expressed that they enjoyed working with Food Tech; how often do you hear that on a construction project? The Construction Manager handled the construction meetings with a "let's get it done" attitude, and kept us involved throughout the entire project. "

Ed Dougherty
General Manager
